## DGT e-Board Bluetooth Walnut/Maple

Price	<b>726.00 Euro</b>
Availability	<b>Availability - 3 days</b>
Number	<b>CHCA16A</b>
EAN	<b>8717662821639</b>

### Product description

**PAY ATTENTION: Only the board, no pieces are included!**

The wireless version of the DGT e-Boards for individual use was released in 2009 and uses Bluetooth to connect to the computer.

The Bluetooth e-Board is available in Rosewood and Walnut and can be used in combination with any of the DGT chess sets: Timeless, Ebony, Royal, Classic, Venus and official FIDE set.

Some of the special features of the DGT Wireless e-Board are:

- Capable of 10+ meters Bluetooth true-wireless communication and approximately 40+ meters successfully tested indoors with high quality dongle
- USB wired communication (3.5 meter mini-USB cable included)
- Board houses a Li-Ion battery, rechargeable over USB cable to PC or main adapter giving 24 hours full play
- Three-colour LED status indicator
- Increased scanning speed (6 scans/second)
- Firmware upgrade feature makes it easy to install future software enhancements and new functions
- [DGT3000](#) and DGT XL clock (optional) functions as display for board instructions

You can find more detailed information in the Bluetooth e-Board installation guide (see bottom).

Bluetooth e-Board firmware and drivers can be found [here](#).

The wireless Bluetooth e-Board is not recommended for tournament use. For a normal tournament set-up DGT serial tournament e-Boards should be used which allow a large number of boards to be connected together either using cables or the wireless DGT Caïssa System.
