Product description

In the 50's and 60's of the twentieth century Chess Set "Zagreb" was one of the most popular chess sets that was used in the most important chess tournaments around the world, among others, in Candidates Tournament which took place in 1959, in three cities belonging to Yugoslavia - Bled, Belgrade and Zagreb.

This beautiful set of chess pieces has two additional figures of the Queen (white and black), which can be used successfully in the promotion of a pawn. Figures in this set are very specific - especially the King, Queen and Bishop. The Knight is made in the Russian style (note that the horse's mouth is closed, slender, bent over a thick neck, breast, beautifully carved head).

Black figures that we see in the pictures are ebonised. They are made to resemble a real ebony chess pieces.
